SOLAR ESS MONTHLY REPORT · OCTOBER 2026 · SOLISCLOUD · PLANT REPORT

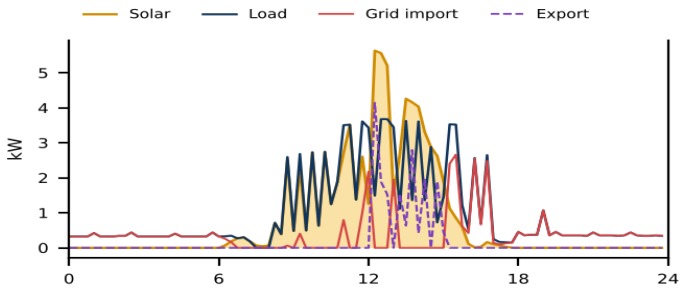

Change settings

Gold shop, Songkhla

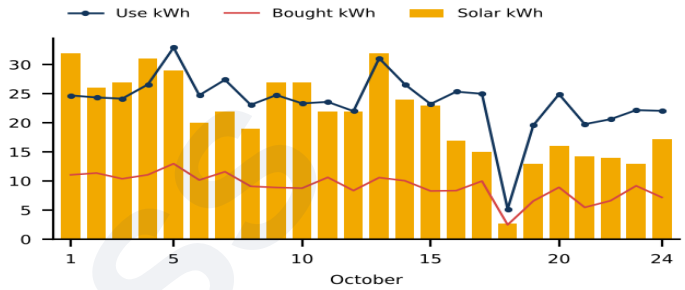

Export · zero-export from 16 Oct

6 kWp · 6 kW 1-phase hybrid inverter · no battery

505	3.51	62%	9.1	156	0.0
kWh solar	kWh/kWp/day	solar share of use	kWh/day bought	kWh exported	kWh/day from battery

24 October, 5-minute data

Daily totals, 1–24 October

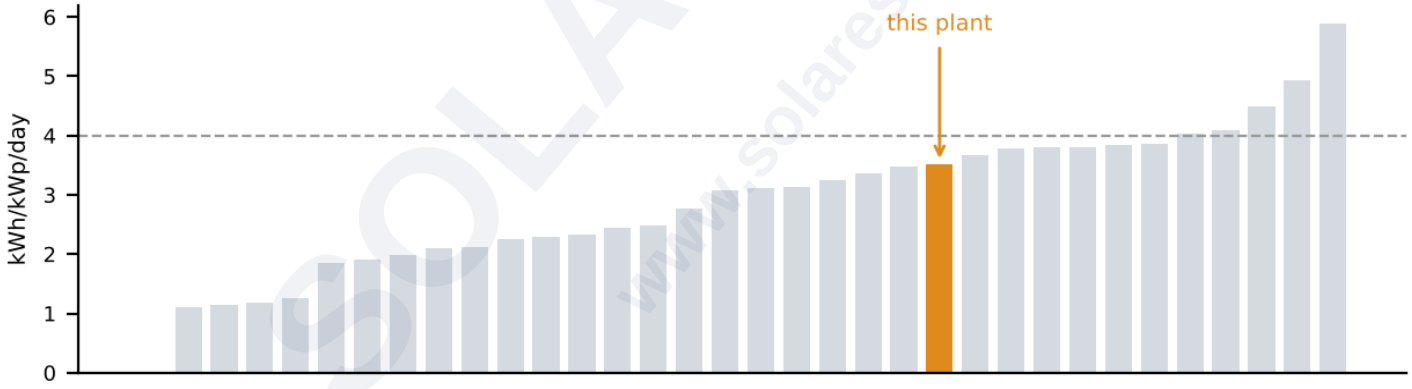

What we found

• No battery. 156 kWh exported before 16 Oct; from 16 Oct export stops but daily solar also drops from 20–30 to 13–17 kWh – the panels are now throttled to the shop load.

What to do

• A 10 kWh battery would store about 8–10 kWh/day that is now lost.
• Otherwise move shop loads (air-con, polishing) to the sunniest hours.

How this plant compares with the other SolisCloud plants (kWh per kWp per day, 1–24 Oct)

Rank 12 of 34 for yield per kWp. Dashed line ≈ 4.0, a typical clear month in the north and centre. A low yield is not always a fault – a full battery or little daytime load makes the inverter throttle the panels.

This plant report is part of the October 2026 SolisCloud fleet review on www.solaress.org (Technical → Monthly Report), which also lists the recommended standard settings. Figures are estimates from monitoring data; site name removed.
