AC combiner set compared: MCCBs, AC SPD and ATS

Solar ESS product comparison · October 2026 · CHINT, Suntree, CSQ, Geya, ABB, Schneider

Our pick: CHINT NXM-125S MCCBs (25 kA) with a Suntree SUP1-40 AC SPD and a Suntree SQ8P PC-class ATS. Good breaking capacity, wide availability and the best value. Schneider EasyPact EZC100H (30 kA) or ABB Formula give more margin at a much higher cost.

Combination	MCCB 4P 80 A / 50 A	AC SPD 4P 385 V	ATS 4P 100 A	Relative set cost
CHINT + Suntree	NXM-125S/4300, 25 kA	Suntree SUP1-40, 20/40 kA	Suntree SQ8P-100/4P, PC class	Low
CHINT + CSQ or Geya ATS	NXM-125S/4300, 25 kA	Suntree SUP1-40	CSQ HYCQ4-125/4 or Geya GATS-G-100, PC class	Low
CHINT only	NXM-125S/4300, 25 kA	NXU-IIG, 40 kA	NXZ-125/4, CB class	Medium
ABB	Formula A1, 18–25 kA	OVR T2	—	High
Schneider	EasyPact EZC100H, 30 kA	iPRD40r	—	Very high

Which ATS class?

A PC-class ATS (Suntree SQ8P, CSQ HYCQ4, Geya GATS) switches faster and suits a grid/backup changeover better than a CB-class unit with built-in breakers (such as CHINT NXZ). Check the transfer time on the datasheet.

Specifications are taken from the manufacturers' published datasheets; check the current datasheet before ordering. For prices and a design for your site, book a consultation at www.solaress.org or LINE: solaress1.
