AC and DC cables for solar compared

Solar ESS product comparison · October 2026 · Thai Yazaki, BCC, LINK, Lapp, Phelps Dodge

> **Our picks: Thai Yazaki THW for AC, and LINK PV1-F for DC.** Choose Lapp or Phelps Dodge H1Z2Z2-K when documented EN 50618 compliance is required.

Cable	Use	Standard	Notes
Thai Yazaki THW 10 / 16 mm²	AC	TIS 11 / IEC 60227	Copper, widely available
BCC (Bangkok Cable) THW	AC	TIS certified	Copper, retail stock
LINK PV1-F 4 mm²	DC	Tinned copper, XLPE, 1000/1500 V	Best value and stock
Lapp Solar 4 mm²	DC	EN 50618 / IEC 62930	Documented compliance
Phelps Dodge H1Z2Z2-K	DC	EN 50618	Documented compliance

Use only copper THW (not aluminium THW-A) for inverter and battery circuits, and only solar-rated PV cable on the DC side: ordinary building wire is not UV- or double-insulation rated for rooftop DC strings.

Specifications are taken from the manufacturers' published datasheets; check the current datasheet before ordering. For prices and a design for your site, book a consultation at www.solaress.org or LINE: solaress1.
