SOLAR ESS MONTHLY REPORT · OCTOBER 2026 · SOLISCLOUD · PLANT REPORT

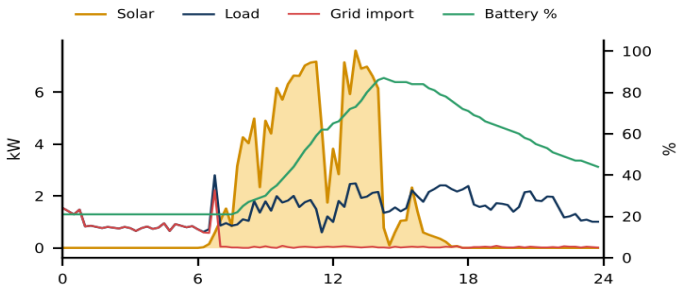

Change settings

Apartment S1, Songkhla

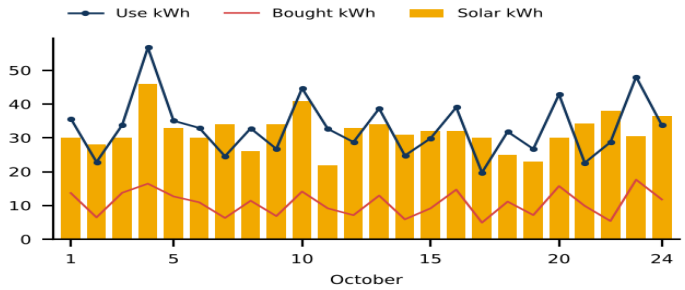

225 kWh exported

15 kWp · 15 kW 3-phase hybrid inverter · battery

763	2.12	68%	10.6	225	19.4
kWh solar	kWh/kWp/day	solar share of use	kWh/day bought	kWh exported	kWh/day from battery

24 October, 5-minute data

Daily totals, 1–24 October

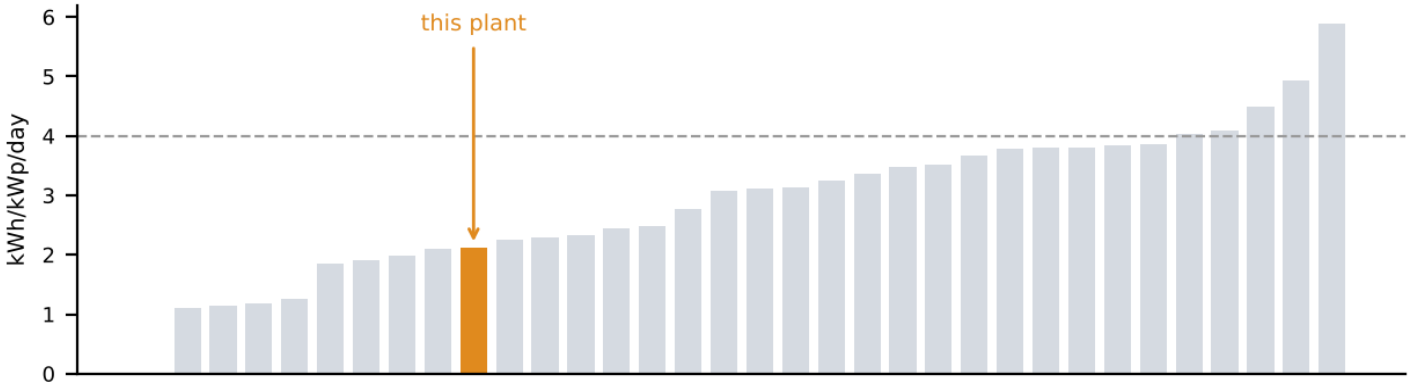

What we found

- Sells 225 kWh while buying 255 kWh (unpaid export).
- Battery cycles 21–87%; yield 2.1 kWh/kWp/day (rainy southern October).

What to do

- Set export limit to 0 W / Solar Sell off, so surplus goes to the battery first.
- Check the Time-of-Use charge slots allow charging all day.

How this plant compares with the other SolisCloud plants (kWh per kWp per day, 1–24 Oct)

Rank 25 of 34 for yield per kWp. Dashed line ≈ 4.0, a typical clear month in the north and centre. A low yield is not always a fault – a full battery or little daytime load makes the inverter throttle the panels.

This plant report is part of the October 2026 SolisCloud fleet review on www.solaress.org (Technical → Monthly Report), which also lists the recommended standard settings. Figures are estimates from monitoring data; site name removed.
