OUR PICK FOR SOLIS

Solis IntelliHome-16kWh-OD

Native CAN link to the Solis S6, IP66 outdoor-rated with heater, IEC 62619, 100 % usable. About 8 kW continuous: add a second unit if night loads go above 8 kW.

MOST POWER

Dyness PowerBrick Plus

200 A both ways (~10 kW) and ≥8,000 cycles at 95 % DoD. Check the inverter maker's approved list before pairing.

Before you buy: no model here lists a cell grade or a TIS (มอก.) certificate. For any 314 Ah third-party battery on a Solis inverter, get written confirmation from Solis first. Keep any battery out of direct sun: LiFePO4 is happiest at 10–45 °C.

Specifications are from the manufacturers' published datasheets; star ratings are Solar ESS's own assessment. Check the current datasheet before ordering. For prices and a design for your site, book a consultation at www.solaress.org or LINE: solaress1.
