LIVING OFF-GRID IN THAILAND × THAM-UP · THUMBS UP GREEN ENERGY

# Be Ready for Any Crisis

## Build the know-how for lasting self-reliance

**Training 22–24 November 2026** | **Nakhon Ratchasima · 20 seats per course**

Being ready for a crisis takes specialist knowledge, and knowledge takes time to sink in. We learn best by doing things again and again until they become a skill we keep. The admins of the Living Off-Grid In Thailand group are running these courses to share real field experience: one free course and one paid course, so the learning centre can keep passing this knowledge on.

**1** Beginner · General public

### Off-Grid Self-Reliance Basics

**Sunday 22 November 2026**

**Free** Limited to 20 seats

The foundations of self-reliance with off-grid solar, for everyday and emergency use: system parts, load sizing, hands-on wiring, safety and maintenance.

Lunch: boxed meal

**2** Intermediate · Installers / electrical background

### Hybrid Solar Design, Installation & Maintenance

**Monday 23 November 2026**

**1,000 THB** 20 seats

Installation tools and standards, PV insulation and I-V curve testing, system design, wiring, maintenance, and the documents for utility approval.

Lunch: buffet

**Classes 09:00–17:00 · Theory, practice and Q&A**

**Free bonus day** Tuesday 24 Nov 2026, 09:00–15:00: design help on your own real project, and more time on the training kits.

### What you get

- Free lunch
- Course handouts (digital files)
- Certificate of completion
- Hands-on practice with real equipment from leading brands

### Venue

Solar-Powered Farm Water Pumping Learning Centre, Nakhon Ratchasima

# Training Schedule

## Course 1 · Off-Grid Self-Reliance Basics · Sun 22 Nov 2026 · Free

| Time | Activity |
|---|---|
| **08.30–09.00** | Registration |
| **09.00–09.30** | Opening: the self-reliance mindset and crisis preparedness |
| **09.30–10.45** | Theory: off-grid system parts (panels, charge controller, battery, inverter) |
| **10.45–11.00** | Break |
| **11.00–12.00** | Theory: load calculation and system sizing for everyday and emergency use |
| **12.00–13.00** | Lunch (boxed meal) |
| **13.00–15.00** | Practice: wiring an off-grid system, basic safety |
| **15.00–15.15** | Break |
| **15.15–16.30** | Practice: testing, maintenance and basic troubleshooting |
| **16.30–17.00** | Q&A, wrap-up and certificates |
| **17.00–19.00** | (Extra time) design help on participants' own real projects |

## Course 2 · Hybrid Design, Installation & Maintenance · Mon 23 Nov 2026 · 1,000 THB

| Time | Activity |
|---|---|
| **08.30–09.15** | Registration and opening |
| **09.15–10.45** | Theory: PV insulation (ISO) and I-V curve testing for commissioning and O&M |
| **10.45–11.30** | Practice: PV insulation and I-V curve measurement |
| **11.30–12.00** | Theory: hybrid system parts |
| **12.00–13.00** | Lunch (buffet) |
| **13.00–14.30** | Installation standards and tools |
| **14.30–16.00** | Practice: wiring, threading IMC conduit, exothermic (one-shot) earth welding and system settings |
| **16.00–16.30** | Maintenance, common faults, and utility permit documents |
| **16.30–17.00** | Q&A, wrap-up and certificates |
| **Tue 24 Nov 09:00–15:00** | (Free) design help on real projects and Q&A · stay on to practise wiring, conduit threading or to make content |

### Brands on display

**Inverters:** Growatt · Sungrow · Solis · VaySunic
**Batteries:** Growatt · BYD · STK · DIY
**Mounting:** Hopergy
**Test instruments:** HT Instrument (23 Nov only)

### Training kits

**22 Nov, off-grid:** 12V emergency kit (MPPT + basic inverter + STK 100Ah) ×2 · 48V Growatt SPF6000 ES Plus + dongle + HOPE 5.0 ×2
**23–24 Nov, hybrid:** 48V Growatt SPM 6000 TL HU + battery · Growatt MINA 10K 1P all-in-one + battery · 48V Sungrow 5K + DIY battery

### How to book

1. Read all the details carefully
2. Fill in the registration form and tick your course(s) (you can join both)
3. Submit and take a screenshot
4. Send it to the admin by LINE or Facebook
5. Wait for the admin to confirm your seat (first come, first served)
6. Course 2: transfer 1,000 THB and send the slip to confirm
7. Come to class on the day

### Payment

Course 2 fee: 1,000 THB. The admin sends payment details once your seat is confirmed.

Ask the admin for the registration form link by LINE or on Facebook: Thumbs Up Green Energy
