SOLAR WATER PUMPING · APPROXIMATE COST

What the whole project costs

Three parts make up the job: drilling the well, the pump, and the solar system that powers it. The solar system can be either the solar inverter pump system (Option B) or the on-grid system (Option C); both are budgeted at about the same amount.

TN-20261020-PUMP-04 | Rev02 | 20 October 2026 | Chiang Rai, Thailand | Approximate prices in THB

Cost by part

1 Drilling a 4" well
Drilling with pipe, accessories and safety sling included
65,000 THB · 31%

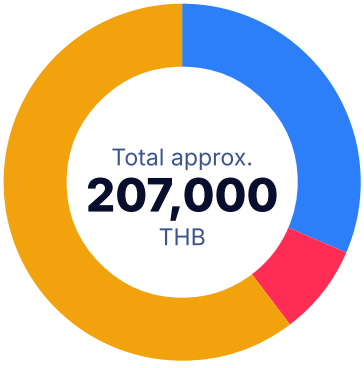

2 TORQUE 1.5 HP pump
TQ-SP-2DLBM20-4/S borehole pump, 1-phase 220 V
17,000 THB · 8%

3 Solar system
Solar inverter pump system (Option B) or on-grid system (Option C), with panels, protection and installation
125,000 THB · 60%

How the budget splits

Well · 31% | Pump · 8% | Solar system · 60%

TOTAL PROJECT COST, APPROXIMATE

207,000 THB

1. Drilling a 4" well	65,000
2. TORQUE 1.5 HP pump	17,000
3. Solar system	125,000

In order of work

1. **Drilling a 4" well** — 65,000 THB
2. **TORQUE 1.5 HP pump** — 17,000 THB
3. **Solar system** — 125,000 THB

All prices are approximate and before VAT. The drilling price includes the pipe, accessories and safety sling; the final depth and cost are confirmed by the well driller on site. The solar system figure covers either Option B (solar inverter pump) or Option C (on-grid).
