SOLAR ESS MONTHLY REPORT · OCTOBER 2026 · SOLISCLOUD · PLANT REPORT

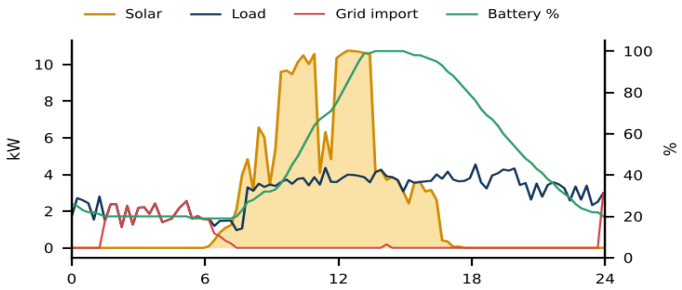

Healthy

Home S1, Songkhla

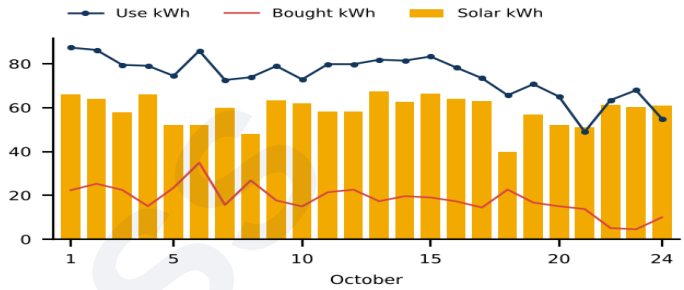

Best yield · check kWp

10 kWp · 10 kW 1-phase hybrid inverter · battery

1414	5.89	75%	18.3	0	24.0
kWh solar	kWh/kWp/day	solar share of use	kWh/day bought	kWh exported	kWh/day from battery

24 October, 5-minute data

Daily totals, 1–24 October

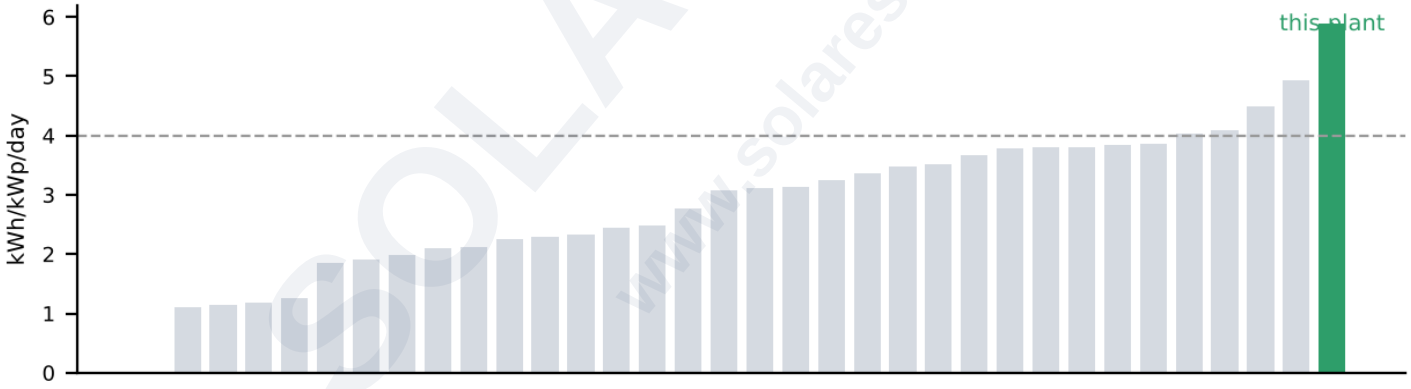

What we found

• Best yield in the fleet: 5.9 kWh/kWp/day. Peak 10.8 kW on '10 kWp' – the registered capacity is probably lower than the panels installed.
• Battery full by 13:10; 8 low-battery and 8 under-voltage alarms.

What to do

• Correct the PV capacity in SolisCloud.
• A second battery would use the afternoon surplus (battery full by 13:10).

How this plant compares with the other SolisCloud plants (kWh per kWp per day, 1–24 Oct)

Rank 1 of 34 for yield per kWp. Dashed line ≈ 4.0, a typical clear month in the north and centre. A low yield is not always a fault – a full battery or little daytime load makes the inverter throttle the panels.

This plant report is part of the October 2026 SolisCloud fleet review on www.solaress.org (Technical → Monthly Report), which also lists the recommended standard settings. Figures are estimates from monitoring data; site name removed.
