NEWS · MARKET & MANUFACTURERS

JinkoSolar stays the world's No. 1 solar panel maker for the 7th time

Summary by Solar ESS Working Group · 2 Nov 2026

- **2025 shipments: 86.8 GW** of solar modules, making JinkoSolar the world's No. 1 module seller for the **seventh time**.
- **All-time total:** more than 400 GW shipped by the end of Q1 2026, of which over 220 GW were Tiger Neo series panels.
- **Current flagship:** Tiger Neo 3.0 N-type TOPCon panels, mass-produced at over 24.8% efficiency and up to 670 W.
- **Patents:** more than 3,500 by the end of 2025, including over 700 for N-type TOPCon technology.
- **2026 plan:** high-power panels above 640 W are expected to be more than 60% of shipments.
- **The other side:** shipments actually fell about 7% from 92.9 GW in 2024, and the company made a loss. It blamed weak prices, rising costs and industry overcapacity.
- **Outlook:** 75–85 GW of panel shipments expected in 2026. Energy storage was the bright spot: 5.2 GWh shipped in 2025, up 420%.

Note: pv magazine lists JinkoSolar itself as the author of the main article, so it is a company article rather than independent reporting. The decline and the loss come from TaiyangNews.
