Solar ESS product sheet · October 2026

Battery

Intellihome, LV Topsun G4, Flex Core ID and Dyness

Sized to your evening load and the backup you need, not the biggest box on offer.

> **A battery is only as good as its conversation with the inverter.**

What we fit

Chemistry	LiFePO4 (lithium iron phosphate)
Brands	Intellihome, LV Topsun G4, Flex Core ID, Dyness
Pairing	Checked against the inverter maker's approved battery list for each project

Why we pick it

- LiFePO4 is the safer lithium chemistry and keeps its cycle life in Thai heat.
- An approved pairing means the battery and inverter talk to each other properly, so charging, backup and warranty all work as they should.
- Sized from the site's real evening and night consumption, read from the meter data.
- Installed in shade, ventilated and off the floor, with its own DC breaker.

For prices and a design for your site, book a consultation at www.solaress.org or LINE: solaress1. All qualifications and certificates will be furnished upon request or upon completion of contract.
