Fuses

SUNTREE gPV fuses on every string

Solar-rated DC fuses in touch-safe holders.

> **The fuse is the cheapest part in the DC box, and the one that stops a string fault becoming a fire.**

What we fit

DC fuses	SUNTREE, gPV class, rated for the system DC voltage
Fuse holders	SUNTREE, touch-safe

Why we pick it

- gPV fuses are made to clear the low fault currents a solar string produces. An AC fuse is not.
- Fitted on both the positive and negative lines where strings run in parallel.
- The rating is chosen above the string current and within the panel maker's maximum series fuse rating.
- Holders open safely to check or change a fuse, with no live parts exposed.

For prices and a design for your site, book a consultation at www.solaress.org or LINE: solaress1. All qualifications and certificates will be furnished upon request or upon completion of contract.
