Solar ESS product sheet · October 2026

Inverters

We install all sorts of brands: Huawei first, with five alternatives we trust

The right brand depends on the site: roof shading, phase balance, battery plans and budget.

The inverter is the heart of a solar system.

It turns the DC power from the panels into the AC power your home or business uses, decides when to charge the battery or draw from the grid, and shuts the system down safely when something is wrong. It is also the part most likely to need attention over 20 years, so we choose on service first and price second.

Hybrid inverter with battery

Inverter and AC/DC combiner box

Indoor installation over a wireway

Our first choice · 5 kW to 100 kW

Huawei

Huawei is the inverter on most of our sites. What we love most is the service system behind it. We can submit a ticket directly to Huawei, no matter where your installer or supplier is, and you are treated as Huawei's own customer.

If a unit has to be claimed, Huawei delivers the replacement to your door and collects the faulty one for investigation.

Homes with uneven loads

Solis

We love how it supports an unbalanced system at home, where the three phases carry different loads, and its practical remote app.

Microinverter

Enphase

A long-term warranty and a worry-free option for owners who want to fit it and forget it.

Microinverter

ATMOCE

We love its safety and durability. Each panel has its own small inverter, so there is no high-voltage DC cable running across the roof.

All-in-one storage

Sigenergy

Inverter, battery and energy management in one modular stack. Battery modules can be added as needs grow, with an EV charger option in the same system.

Shaded and complex roofs

SolarEdge

We love the optimizers, which let every panel work at its own best, and the long warranty. The monitoring app is excellent.

For prices and a design for your site, book a consultation at www.solaress.org or LINE: solaress1. All qualifications and certificates will be furnished upon request or upon completion of contract.
