Solar ESS product sheet · October 2026

Surge protection (SPD)

SUNTREE surge protection on both the DC and AC sides

Fitted in the DC and AC boxes, with a proper earth.

> **An inverter is electronics. Surge protection costs a small fraction of the inverter it saves.**

What we fit

SPD	SUNTREE, DC and AC

Why we pick it

- Thai storm seasons bring lightning surges down both the roof cables and the grid line. Protecting one side only leaves the inverter exposed.
- Installed close to the equipment with a short, direct earth connection, which is what makes the device effective.
- Checked at every maintenance visit.

For prices and a design for your site, book a consultation at www.solaress.org or LINE: solaress1. All qualifications and certificates will be furnished upon request or upon completion of contract.
