Test instruments

Hioki and Fluke

What we measure with matters as much as what we install.

Every system is tested before handover and at each maintenance visit.

What we fit

Instruments	Hioki, Fluke

Why we pick it

- Insulation, earth and string measurements are recorded at commissioning, so later readings have something to be compared against.
- Thermal checks on boxes and connections find a loose terminal before it becomes a fault.

For prices and a design for your site, book a consultation at www.solaress.org or LINE: solaress1. All qualifications and certificates will be furnished upon request or upon completion of contract.
