## SOLAR ESS MONTHLY REPORT · OCTOBER 2026 · SOLISCLOUD · PLANT REPORT

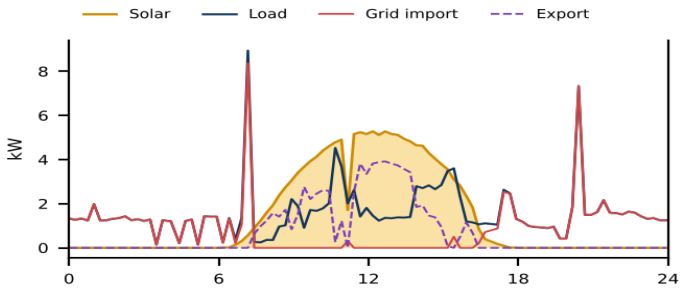

Change settings

# Home S12, Chiang Rai

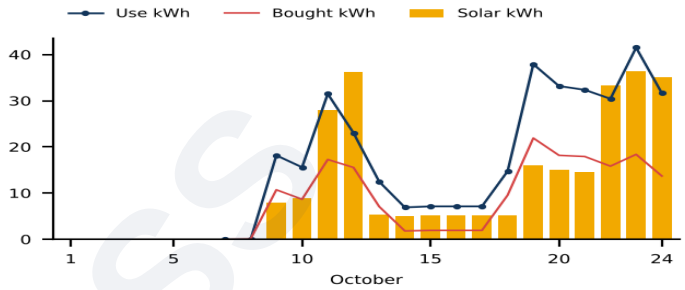

New · repeated data · export

6.5 kWp · 10 kW hybrid inverter · no battery

| 263 | 2.25 | 48% | 10.1 | 94 | 0.0 |
|---|---|---|---|---|---|
| kWh solar | kWh/kWp/day | solar share of use | kWh/day bought | kWh exported | kWh/day from battery |

24 October, 5-minute data

Daily totals, 1–24 October

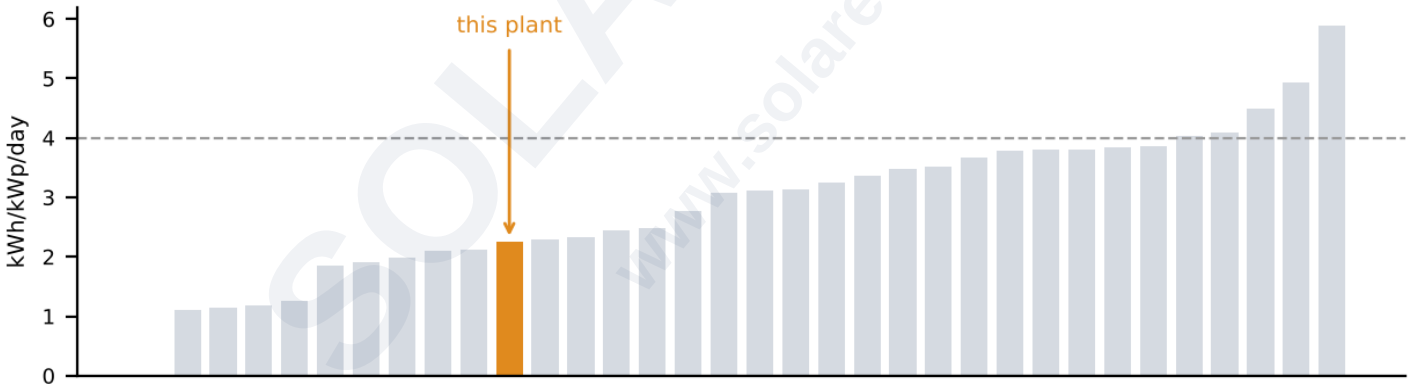

### What we found

• Connected 7 Oct. 13–17 Oct show exactly the same 5.2 kWh every day – the datalogger was probably not updating.
• No battery; exports up to 3.9 kW at midday (94 kWh so far).
• 6.5 kWp on a 10 kW inverter – room for about 4 kWp more panels.

### What to do

• Confirm the datalogger now reports live data.
• Set export limit to 0 W unless a PEA permit is in place; consider more panels or a battery later.

## How this plant compares with the other SolisCloud plants (kWh per kWp per day, 1–24 Oct)

Rank 24 of 34 for yield per kWp. Dashed line ≈ 4.0, a typical clear month in the north and centre. A low yield is not always a fault – a full battery or little daytime load makes the inverter throttle the panels.

This plant report is part of the October 2026 SolisCloud fleet review on www.solaress.org (Technical → Monthly Report), which also lists the recommended standard settings. Figures are estimates from monitoring data; site name removed.
